

Proposal

The proposal must include the following segments:

Submit a 1/2-page project proposal plan which answers the following questions:

1. What is the **title** of your leadership project?
2. Which **option** did you choose and **why** did you select the option/topic?
3. Who is your proposed **audience**?
 - a. *Which teachers will you serve with your PD and activities?*
 - b. *What grades, subjects, and how many students do they teach?*
4. How will your project **demonstrate integration of STEM** in the classroom?
5. What **outcomes or expectation** do you hope to see for your educators?
6. How will you **follow up** with the teachers in attendance?

Outcomes/ Expectation

Follow-up

Proposal Submission = 10 points

1. STEAM Career and Safety Day with Molly Shirley and Rendi Carter

2. We want to introduce STEM to all our students in our school. We felt this option would be a great way to introduce our 6th grade students to what STEM is in the classroom setting and what opportunities will be available to students as they get older in the STEM career field. In elementary school, students attended a lab setting only once a week so their exposure to this type of learning is limited.
3. My proposed audience is 6th grade students and teachers. We will have roughly 130 students and teachers in attendance. In addition to our 6th grade students and teacher, we will invite 7th and 8th graders to visit with our vendors to explore STEM career opportunities.
4. My project will demonstrate the integration of STEM in the classroom through the introduction of a variety of STEM career options as well as student led activities for our 6th graders to introduce them to STEM. At our school, STEM is offered for 7th and 8th graders. We want to introduce the lab setting class and activities to our 6th graders and teachers. Our hopes are to get a school wide implementation of STEM in all subjects across the board at our school.
5. We hope that STEM can be modified to incorporate a variety of learning opportunities and content in the classroom. Our goal is that educators will be able to effectively collaborate to design and develop lessons to fit all content areas.
6. We will follow up about our Career and Safety event with teachers at our next staff meeting to get an insight of what seemed beneficial to them that they could use in the classroom. We would love to be able to continue this event making improvements to be more beneficial each year.
